2 August. After 2000, night flying was practiced but no details could be observed.

- 2 A and 5 August. There was air activity during daytime by MiG-15s and U-MiG-15s. On 3 August, night flights were also made.
- 2. On 24 and 29 July and on 5 August, a Fishnet-type radar set and another radar set, probably of type AA 4 MK 3, were observed about 300 meters west of Biesenthaler Strasse and 80 to 100 meters south of the runway. A generator was parked near the two sets. On 24 July, a Token-type set, a Fishnet-type set and a third set of an unidentified type, either a Dumbo-type set or a Kniferest-type set, were located north of the field and south of the Finov-Finovfurt road. On 27 July, only the two sets mentioned first were seen. At 1600 on 29 July, all of the sets had disappeared.
- 3. After late July, the AA gun emplacement in the southeastern corner of the field was vacant. On 5 August, 5 soldiers wearing red-bordered black epaulets were observed in the emplacement. 3 A new temporary building was observed in the northeastern corner of the field near the alrt flight.
- 4. Between 1600 and 1700 on 5 August, individual flights were made by MiG-15s and U-MiG-15s. Some of the aircraft circled once over the field and then disappeared from view. One MiG-15 or U-MiG-15 towing a sleeve target took off and shortly afterward, another aircraft landed after having released its sleeve target.
- 5. Several radio installations and radar stations were observed in the area cast of the Finovfurt farm. About 100 meters east of the farm was a heap of debris upon which a Token-type set was located. This set was believed to have been located south of the Finov-Finovfurt road prior to 5 August. A radio installation with one mast and a Fishnet-type radar set were observed in the area of the Finovfurt farm. A second Token-type set and a second Fishnet-type set were located north of Sommerfelde.

  A Kniferest-type set was seen in the northern section of the field.

  The AA gun emplacement in the southeastern corner of the field was wacated.

1. Commant. Finow airfield is still occupied by a fighter division headquarters and 2 fighter regiments. The reported number of MIG-15s agrees with the assumed aircraft strength. The aircraft numbers have repeatedly been reported from Finow. Air training activity mainly implies firing at towed sleeve targets during daytime and at might.

2. Comment. According to available information, the following three radar stations are located near Finou airfield:

- a. 1 Token-type set, 1 Fishnet-type set and 1 radio installation with 1 mast in the area of the Finousurt farm;
- b. 1 Token-type set and 1 Fishnet-type set north of Sommerfelde, east of Eberswalde;
- c. 1 Kniferest-type set, 1 Fishnet-type set and 1 model AA 4 MK 3 set at the airfield.

The locations of the installations have repeatedly been changed.

3. Comment. The AA gun emplacement has previously been occupied by 6 x 37-mm AA guns. It has not been determined whether the AA unit transferred for firing practices or to another location.
